Acronis SCSVets

*works to drastically **reduce veteran and military spouse underemployment** and **eliminate America's cyber workforce shortage** by arming participants with the **internationally-recognized credentials, skills, and resources** they need to pursue self-sustaining cyber careers – at **zero cost** to them.*

Phoenix, AZ Cohort Attends Training

America's Need

America is the proud home to more than 18 million veterans, with roughly 200,000 service members retiring their uniforms every year. As those who have served seek opportunities in the civilian sphere, many lack the certifications they need to compete, particularly in the cyber/IT sector.

Yet, with more than half a million unfilled cybersecurity jobs, America is facing a national security crisis. Acronis SCSVets believes there is no group better suited to fill this gap than our veterans and military spouses, who possess the critical skills and mindset required to be successful cyber/IT professionals.

Our Unique Approach

Acronis SCSVets' unique and high-touch programming utilizes cross-sector partners embedded in our community to provide cutting-edge cyber/IT training and certification, available in both hybrid and online formats. This approach eliminates geography as a barrier for service member or spouse participation.

Our students are prepared to excel in both public and private sector organizations. To become the cybersecurity and IT professionals of tomorrow, participants combine the valuable skills they learned in the military with the training they receive from Acronis SCSVets to thrive at organizations with a clear need for qualified cyber talent.

Our Offerings

- **Cyber Certifications.** Our participants can obtain stacked cyber certificates, including internationally-recognized CompTIA A+, CompTIA Network+, CompTIA Security+, Windows 10, and Acronis SCS credentials.

- **Career Skills Workshops and Social Services Support.** Participants have access to quarterly civilian-led career skills workshops and ongoing social/life services support.

- **Career Pipelines.** Participants are connected with cyber and tech employers from a diverse pool of industry partners.
